INTRODUCTION TO XT.COM PARTNERSHIP

Tamandua AI Trading

XT.COM Partner Registration

- The affiliate-based fee revenue share model, commonly used on overseas futures or cryptocurrency futures exchanges, is simply a structure where "I receive a share of the trading fees generated by the members I referred, for life (or for the duration of the contract)."
- Because futures trading uses leverage and has a high trading frequency, the fees generated are much larger compared to regular spot trading, making it very popular among affiliate marketers.

Key Features:

- 1) Register and distribute invitation URLs
- 2) Share trading fee profits with XT.COM
- 3) Ability to adjust the trading fee distribution ratio individually
